97 West 169th Street RFP Addendum

RFP Issue Date: December 21, 2018
Pre-submission Conference Date: January 25, 2019
Addendum 1 Issue Date: February 19, 2019

Contents of the Addendum

A. Questions and Answers – Enclosed are questions and answers that were asked at the 97 West 169th Street RFP pre-submission conference held on January 25, 2019 as well as questions sent to the 97 West 169th Street RFP email address.

B. Additional Site Information – Additional maps are provided with information on site boundaries and topography.

C. Contact Information – Contact information is provided for those individuals who attended the pre-submission conference and indicated their willingness to share their contact information.

General Questions

Q1: Can HPD provide a survey given the topography of the Site is so challenging?
A1: HPD cannot provide a survey of the Site. Given the topography of the Site, additional information on elevation and site boundaries is provided in part B of this Addendum.

Q2: The most important information is topological information because of the extreme elevation changes and rock outcroppings. It's difficult to plan a responsive building without knowing more about the topo information.
A2: Given the topography of the Site, additional information on elevation and site boundaries is provided in part B of this Addendum.

The contour maps in part B of this Addendum were made using a planimetric basemap layer containing citywide 2-foot contour line features and is hosted on the NYC Open Data website at this link: https://data.cityofnewyork.us/City-Government/Contours/3cdm-p29e.

The New York City Department of Finance (DOF) Digital Tax Map is available at this link: http://maps.nyc.gov/taxmap/. This map, along with information from DOF Automated City Register Information System (ACRIS) (https://acrisweb.csc.nycnet/cp/) for Bronx Block 2519, Lots 27 and 32 and surrounding tax parcels provides information about the boundaries of the Development Site.

Q3: Will HPD arrange to open the gate at the 97 West 169th Street site on a preannounced date, say some day next week, to allow surveyors onto the site? The depth and northern and eastern location of the rock cannot be ascertained without actual entry to the site. Site slope north to south also requires access for accurate measurements.
A3: HPD will provide access to the Development Site on Tuesday, February 26, 2019 at 10 AM. Interested respondents that wish to see the Site must RSVP to 97west169stRFP@hpd.nyc.gov by Monday, February 25, 2019 at 4:00 PM. Only two representatives per organization can attend the site visit and no equipment or survey instruments will be allowed.

Q4: Pooling resources could be a way for respondents to make the cost of the survey less expensive. Is there a way for respondents to share contact information?
A4: Contact information is provided for attendees of the 97 West 169th Street RFP Pre-submission conference that wished share their information in Part C of this addendum.

Q5: Can you describe the post-selection process, who is doing it, and how long will it take?
A5: The Site is City-owned property and it will have to go through the Uniform Land Use Review Procedure (ULURP) process that gives the City the authority to dispose of the property. After a selection is made, HPD will work with the selected development team to prepare for ULURP and put together the ULURP package. Pre-ULURP, or the preparation period before ULURP begins, includes working with the architect, doing an environmental study, working with HPD's Bronx Planning, Building and Land Development Services (BLDS), and Special Needs Housing units, and with the New York City Department of City Planning (DCP). Pre-ULURP may take up to a year or more. At the point at which the application is considered complete and satisfactory to DCP, the application gets submitted to DCP and is certified. Certification is the official start of ULURP.

ULURP itself will take approximately seven months. HPD will be the applicant on the ULURP. HPD will be responsible for most of the write up of the application and will ask the development team to provide drawings, a zoning analysis, and other required exhibits. The Community Board will hold a hearing to

review the ULURP application and will give an advisory opinion followed by a hearing given by the Borough President and an advisory opinion from the Borough President. Then the application will go to the City Planning Commission and the City Council and finish with a Mayoral Hearing. HPD will shepherd the team through the process, with coordination and prep calls and meetings for each milestone. From the time of selection, the pre-ULURP and ULURP process will take about a year and half to two years.

Q6: What is the status of the park that is planned on the north side of the block?
A6: The New York City Department of Parks and Recreation (DPR) hosted a scoping for the design of Corporal Fischer Park in January 2019 with the community. DPR is now developing the design of the park and construction is anticipated to begin in 2021.

Q7: Is the park fully funded?
A7: Yes, Corporal Fischer Park is fully funded.

Q8: Given where the park is at in the planning process, will the park be available for construction staging for the housing development?
A8: If all proposed staging activity terminates by spring 2021, DPR is open to reviewing proposals to use the park for construction staging.

Q9: What is HPD's policy on reaching out to City Council or community boards?
A9: Respondents are open to engaging with stakeholders as they see fit. HPD will assess and score only on the submissions.

Q10: Given the City's recent stance on modular construction, which has been really positive, are there any special considerations here for a team that uses modular construction?
A10: There is no scoring preference for using modular construction.

Q11: Will the sign-in sheet from the pre-submission conference be posted?
A11: Yes, the sign-in sheet from the 97 West 169th Street RFP Pre-submission conference is included in Part C of this addendum and will be available on the 97 West 169th Street RFP page on HPD's website (https://www1.nyc.gov/site/hpd/developers/request-for-proposals/97-west-169th-street-rfp.page).

Submission Requirements

Q12: The RFP notes that the consultant team must have experience with a rail overbuild. Is that applicable to this RFP?
A12: No.

Q13: The criteria refer to a construction manager to be part of the team. Does this refer to the general contractor?
A13: Yes.

Q14: Is there a Service-Disabled Veteran-Owned Small Business (SDVOSB) requirement?
A14: No, there is no requirement for SDVOSB enterprises.

Financing and Affordability

Q15: When is the 2019 SARA Term Sheet coming out?
A15: Respondents to the RFP should adhere to the SARA term sheet that is dated November 13, 2014 and is currently on HPD's website. Note that a subsidy amount of up to $125,000 per unit is allowed for proposals assuming 9% Low Income Housing Tax Credits and up to $75,000 per unit is allowed for proposals assuming 4% credits. HPD will provide further instructions if a new SARA term sheet is released before the April 4th submission deadline.

Q16: If the new SARA term sheet comes out on April 2 and submissions are due on April 4, what version of the term sheet should respondents use?
A16: Respondents to the RFP should adhere to the SARA term sheet that is dated November 13, 2014 and is currently on HPD's website. Note that a subsidy amount of up to $125,000 per unit is allowed for proposals assuming 9% Low Income Housing Tax Credits and up to $75,000 per unit is allowed for proposals assuming 4% credits. HPD will provide further instructions if a new SARA term sheet is released before the April 4th submission deadline.

Q17: If using NYC 15/15 rental subsidy, does the rental subsidy apply to only the homeless units or could the rental subsidy apply to all the units and NYC 15/15 operating support only apply for the homeless services?
A17: Respondents may replace the SARA program's 30% general population homeless set-aside requirement with a 30% supportive housing set-aside. Such projects may assume service and rental assistance funding through the New York City 15/15 Supportive Housing Initiative or other available funding sources. Rental assistance associated with NYC 15/15 or other supportive housing operating funding should only be applied to the supportive units. Non-supportive units would receive project based Section 8 vouchers.

Q18: Should proposals assume prevailing wage?
A18: Yes, the SARA term sheet assumes that project based Section 8 vouchers will be used, which triggers Davis-Bacon prevailing wage requirements.

Q19: Does the supportive set aside have to be senior supportive or any supportive population?
A19: For the purposes of the RFP, assume units are restricted to residents 62 years and older.

Q20: Do the age restricted units have to be restricted to 55 or 62?
A20: For the purposes of the RFP, assume units are restricted to residents 62 years and older.

Design

Q21: Are there any ADA requirements for the units?
A21: Submissions must comply with the accessibility requirements laid out in HPD's Design Guidelines for Multifamily New Construction and Senior Housing, which may include the Americans with Disabilities Act.

Q22: How will special inspections be handled for this project? How are they handled on other HPD projects?
A22: Special inspections are conducted during construction to verify that work was performed in accordance with approved plans and specifications, and they must be performed by special inspectors on behalf of a registered special inspection agency. Special inspections will not happen prior to construction

loan closing and disposition of the site to the selected development team, at which point they will be the responsibility of the development team.

B. Additional Site Information – Additional maps are provided with information on site boundaries and topography.
